BOOKCASES

The bookcase has evolved beyond its original intended use of storing and organizing books. With its easy-access open shelving allowing quick retrieval of teaching tools and classroom accessories, the bookcase has become a vital part of the modern classroom.

Achieva Bookcases combine the best of modern design, durability and convenient functionality. Choose from a variety of distinguished, decorative laminate finishes to best suit your classroom design.

The attention to detail and use of premium grade materials ensure that these well-built bookcases will provide years of trouble-free use. All horizontal shelving uses 1" premium, industrial-grade particle board for optimum support and 100-pound weight capacity. The solid, one-piece finished back panel adds structural integrity and stability to the design. Shelving is adjustable in 1-¼" increments to optimize storage options and maximize space utilization, and pin-lock shelf adjusters ensure that shelves remain locked in place.

Achieva Bookcases are a standard 12" depth, a nominal 36" width, and are available in a variety of heights. Maximize your available space with heights of 36, 48, 60, 72 or 84 inches.
