REDEFINING TFL ON PLYWOOD PERFORMANCE

EVERPLY+

Funder by Genesis and Garnica have joined forces, using their expertise in TFL and plywood to engineer an enhanced TFL on Plywood panel solution. EVER**PLY+**, an elevated version of EVER**PLY**, is exclusive to Funder in the U.S., raising the bar on performance, aesthetics, and sustainability.

ENGINEERED FOR YOUR CORE NEEDS

Dimensional thickness accuracy
Allows for fabrication and application with minimal tolerance variants

Virtually void-free core
High-quality plywood core delivers premium machinability and reduced scrap rates

More design possibilities
Engineered for defect-free results on any decorative TFL surface, textured or smooth

Enhanced panel stability
Designed to be lightweight with enhanced performance to reduce warping

A LOW-CARBON FUTURE
Garnica sources poplar from responsibly managed European plantations ensuring replanting and full traceability

A LONG HISTORY OF SUSTAINABILITY

We are proud to partner with Garnica, a company that prioritizes the environment through carefully- and sustainably-managed forests. Their premium, carbon neutral plywood cores are produced in zero-waste facilities using 100% renewable resources.

U.S. EXCLUSIVE

Funder by Genesis is the only U.S. manufacturer to partner with Garnica to offer EVER**PLY+**, a plywood core specifically designed for TFL applications. The latest evolution in TFL on plywood is a true differentiator in the market and an essential path for closet and cabinet manufacturers to deliver premium panel solutions.

COMPLETE THE PANEL WITH MATCHING EDGEBAND

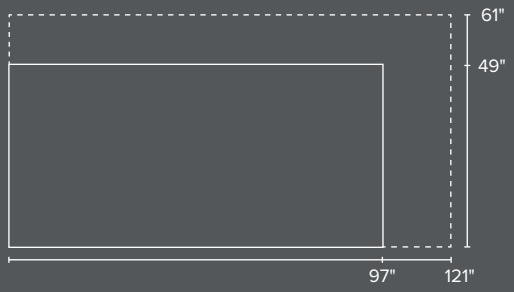
As part of our Surface Synergies material matching system – Genesis has developed an Edgeband Stocking program, designed to help you finish your panel, or your project, with a single source supplier.

All designs within our Surface Synergies program are available in matching TFL | HPL | 3DL | 2DL | Edgeband

Round out your project with Thermofoil or 5 piece doors and moulding – matched perfectly to your panel.

STANDARD SIZING

Build a program with us that meets your project needs with the ability to choose from these panel thicknesses and lengths. Stock what you need with low MOQs and a 2 unit minimum.



Core thickness:

9mm | 12mm | 16mm | 18mm | 19mm
